CADKON+ 2024 Service Pack 2 News

CADKON+ 2024 Service Pack 2 contains fixes for CADKON+ ARCHITECTURE, CADKON+ RC and CADKON+ BASIC version 2024.

It is intended for all commercial **CADKON+ 2024** installations (build **24.0.34**) or **CADKON+ 2024 SP1** (build **24.1.45**). These are installations downloaded before the 18th of December 2023, which is the date of the Service Pack 2. Installations downloaded after this date already contain the Service Pack 2 and it therefore does not need to be installed separately.

Installation CADKON+ 2024 Service Pack 2 will also automatically install the previous [Service Pack 1](#) if it has not been installed yet.

The exact build of the installed CADKON+ can be verified by command „_CKABOUT“, directly in the CADKON+.

General information about service pack installation

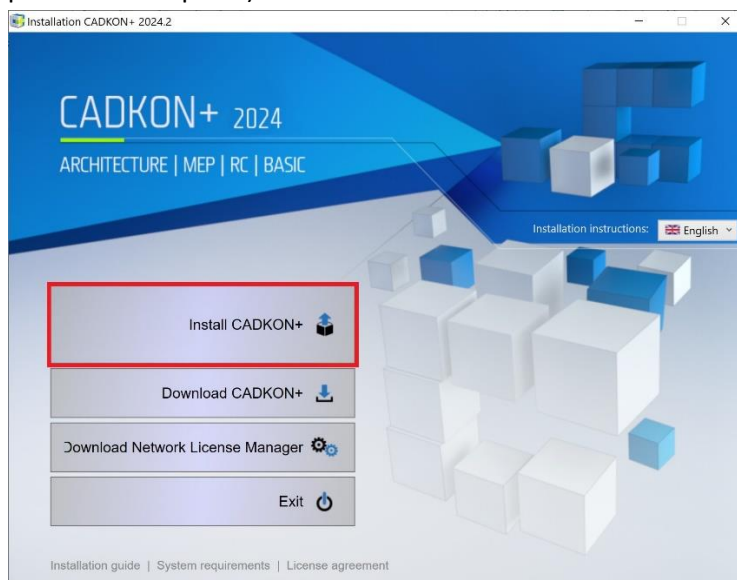

CADKON+ service packs are always part of a CADKON+ online installation. Regardless of the CADKON+ 2024 version you have installed, online update of the program will update all required files to their newest versions.

The service pack installation is carried out using an updated CADKON+ 2024 exe file (*SetupCadkonPlus_2024.exe*). After running the exe file, installation program will automatically identifies whether CADKON+ 2024 is or is not installed and will offer one of the following options:

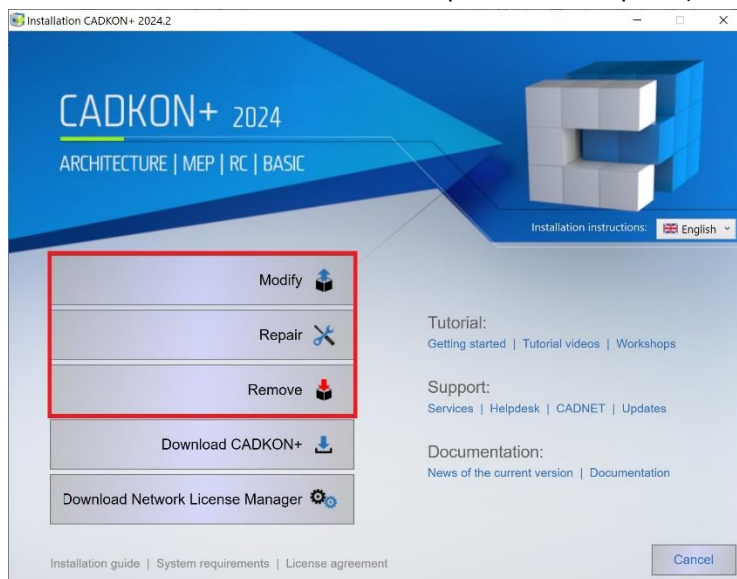

- **Update CADKON+** (in cases when an older version of CADKON+ 2024 is found on the particular computer).

- **Install CADKON+** (in cases when no older version of CADKON+ 2024 is found on the particular computer).

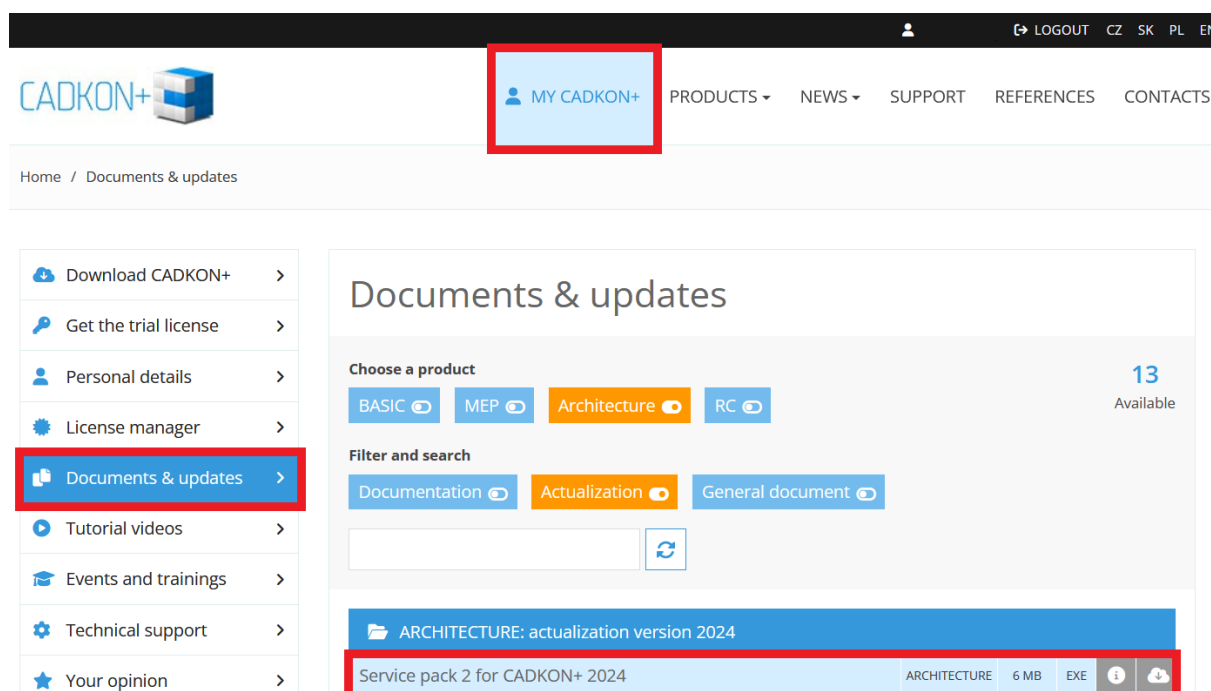

- **Configure CADKON+** (in cases when no program update is available and the newest version of CADKON+ 2024 is installed on the particular computer).

Installation on a computer with already installed CADKON+ 2024

You have received the Installation file *SetupCadkonPlus_2024.exe* as a link in an email from Graitec company or you can download it from www.cadkon.eu.

To download it from www.cadkon.eu you need to sign up (register) and go to a section „MY CADKON+“ ▢ „Documents and updates“.

Installation process

If you have CADKON+ 2024 already installed on your computer, proceed as follows:

1. Download the updated installation file *SetupCadkonPlus_2024.exe*.
2. Close CADKON+.
3. Run the downloaded file *SetupCadkonPlus_2024.exe*.
4. Click on „Update CADKON+“, and continue in the installation.
5. When the installation is completed, click on „Finish“.

Warning: The program update cannot be uninstalled separately.

Note: By Service Pack 2 installation, the **Slovak add-on** (an add-on modifying CADKON+ Architecture outputs into the Slovak language) will also be updated, if it is installed.

Verification of Service Pack 2 version

If you need to verify the installed Service Pack 2 version, proceed as follows:

1. In Start menu (Windows) go to Control Panels/ Programs/ Programs and functions.
2. In the list of all installed programs, find CADKON+ **2024.2**. In Details of the record, you will find the pack label **24.2.55** and the installation date.

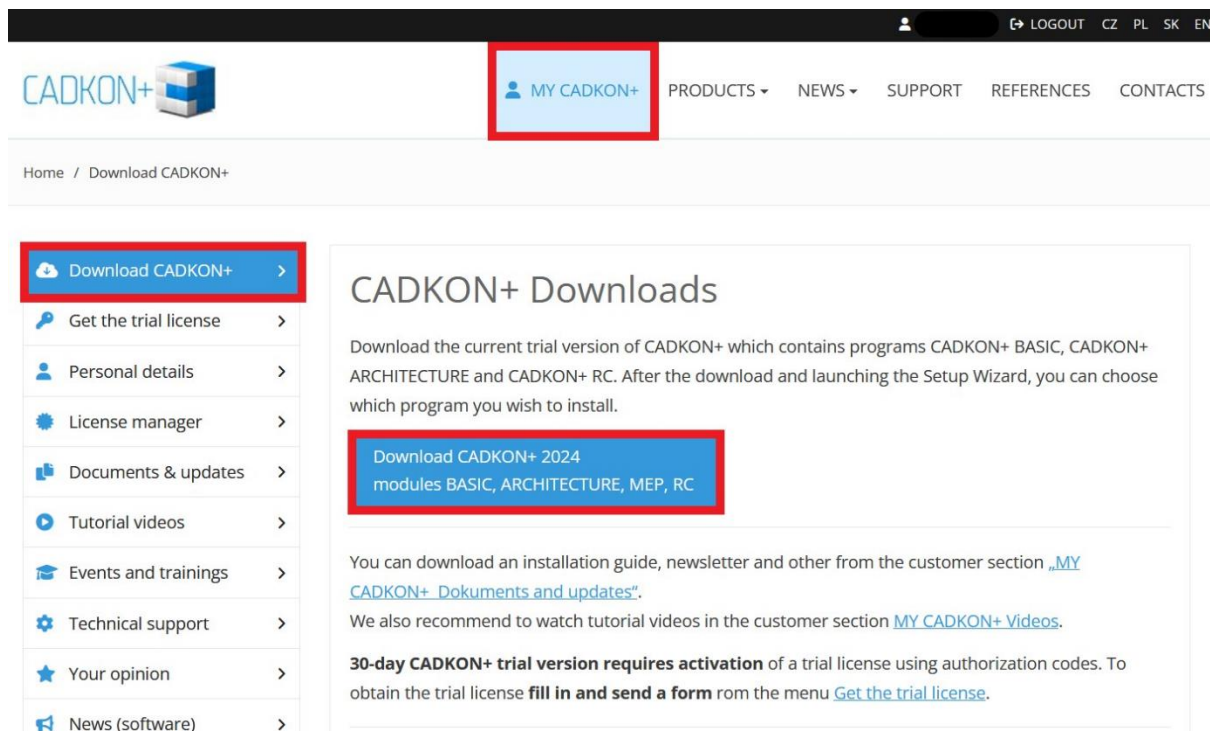

Installation on a computer without CADKON+ 2024

You can install CADKON+ 2024 on a computer with no CADKON+ installed using an updated exe file *SetupCadkonPlus_2024.exe*, which you have received as a link in an email from Graitec company or you can download it from www.cadkon.eu.

To download from www.cadkon.eu, you have to sign up (register) and go to section „MY CADKON+“.

Home / Download CADKON+

CADKON+ Downloads

Download the current trial version of CADKON+ which contains programs CADKON+ BASIC, CADKON+ ARCHITECTURE and CADKON+ RC. After the download and launching the Setup Wizard, you can choose which program you wish to install.

[Download CADKON+ 2024 modules BASIC, ARCHITECTURE, MEP, RC](#)

You can download an installation guide, newsletter and other from the customer section [„MY CADKON+ Documents and updates“](#). We also recommend to watch tutorial videos in the customer section [MY CADKON+ Videos](#).

30-day CADKON+ trial version requires activation of a trial license using authorization codes. To obtain the trial license **fill in and send a form** from the menu [Get the trial license](#).

The instructions for the installation can be found in the Installation Guide which is available after you run the CADKON+ installation.

Note: Installation to a new computer using the updated exe file SetupCadkonPlus_2024.exe will always perform a new clean installation that will include all officially issued program updates (service pack, hotfix etc.).

Solved issues common for CADKON+ ARCHITECTURE, CADKON+ RC and CADKON+ BASIC

Drawing

- Program failure when using multiple functions (copy, equidistant) within the MULTIPLE command.
- The Isolate Layers and Unisolate Layers functions change the transparency of layers.

Modifications

- Program failure when trying to edit a Multileader link using a node.
- Program failure when trying to move the text of a fully associated dimension to an object.

Dimensions

- Program failure when trying to disconnect an Xref referenced by associative dimensions.
- The dimensions associated with the object cannot be deleted, the command will be cancelled.

Blocks and attributes

- The Exploding blocks while maintaining their properties command sets all properties to ByBlock.
- Program failure when editing a specific attribute.
- You cannot delete the attribute value with the Del key.
- When using a stretch node in a dynamic block, the scale of the object is displayed incorrectly.

Print

- If all paper formats are filtered in the DWG to PDF printer, the program will fail when entering the Adjust standard paper dimensions (printable area) setting.
- Incorrect printing of dynamic table cells to the DWG to PDF printer if the cells contain a nested text field (contents are printed in black).
- If the Convert all texts to geometry option is not active in the DWG to PDF printer, all texts in the drawing are printed in italics.
- In the Publishing Options dialog, the program does not remember the set path for PDF output if the set path is too long.
- With specific configurations of monitor resolution and Windows font DPI, custom format setting buttons are not visible in the DWG to PDF printer.

Other

- The Copy and rotation command not working if the command is called via a keyboard shortcut.
- Program failure when using the Back function while the reference explorer is displayed.
- Unable to open specific drawing, error "Error: Not that kind of class" is displayed.
- After installing Service Pack 1, information about an available update that has already been installed is constantly displayed.

Solved issues for CADKON+ ARCHITECTURE

Cadastral maps

- If the style explorer is open, when trying to insert a Slovak cadastral map, the cadastral map is not inserted, but only the orthophotomap and utility networks.

Blocks

- Program failure when inserting a block “Input into an object” from the block library.

Rooms description

- The Legend of flats and zones does not work correctly with RGB colors (it is rendered with Index colors).

Bubbles

- Extension line type is incorrectly saved in bubble template.

Tables

- Updating a linked dynamic table does not respect the style of the table in which it was created. After updating the dynamic table, the table is always in the CADKON style.
- Function failure when trying to update linked tables referencing user change bubbles.

Solved issues for CADKON+ RC

Bars

- Creating a running meters item will corrupt the drawing.

Reports and bar bending detail

- The length of the bar does not correspond to the sum of the segments.
- Error in dimensioning of bars segments.
- Bending detail is not updated when the drawing is opened.

Mesh

- Item manager - mesh renumbering does not work.

Bar labels

- Program failure when editing bar label.
- Changing the mark type of the label does not work.

Other

- Explode RC objects displays the new bars.
- Incorrect Replacement of 2D section if WCS is not set.
